*Prince of Soho* Oil on canvas

£5,000

# BLACK

**“We must understand that the universe will spend an eternity in darkness after this brief period of light”**

**Brian Cox 2018**

Artistic ran a show in the Crypt Gallery, St. Pancras Parish Church, London (18/12/18 – 20/12/18) which explored the absence of light. We asked artists to explore the very darkest colour : black. We asked artists to submit pieces of work that were made purely with BLACK. The piece could be in any medium and could explore any fragment of thought that BLACK brings to mind. Black is the nonexistence of or complete absorption of light; it is the exact opposite of white. It is sometimes considered as a non-colour. It is characterised as a tragic, evil, deeply stained colour which can be both full of gloom or misery causing despair and pessimism.
